General Product Overview

D-Galactose, plant derived is intended for use upstream and downstream in biological drug manufacturing processes. For this purpose, BioSpectra has categorized our product as an excipient though one of the primary functions is to be used as a nutrient in mammalian cell culture media. Given the sensitivity of these cells regarding growth, BioSpectra's D-Galactose is manufactured to meet high purity specifications as well as low bioburden and endotoxin demands.

Industry Application

Suitable for use as a cGMP chemical in pharmaceutical manufacturing processes and products.
